

Baritone Sax: download the Tuba part and convert it to Baritone Saxophone as follows:

- Change the clef from bass to treble
- add three sharps to the key signature. Two examples
 - if there's one flat in the key signature, change it so there are now two sharps
 - if there are four flats, change to one flat
- Then, verify each of the accidentals in the piece, especially the notes that were formerly in the key signature.
 - This is a little tricky so see one of the directors for assistance
